

Program Book

2021 3rd International Conference on High Voltage Engineering and Power Systems (ICHVEPS)

October 5th - 6th, 2021
Bandung, Indonesia
- Virtual Conference -

Organized by :

Sponsored by :

2021
ICH/EPS

Table of Content

Session Number	Paper No.	Title, Author & Institution	Page
PS1-2	150	<p>New Family of Voltage-Source Converters Derived Using New Basic Cell for Microgrid Applications</p> <p>Pekik Argo Dahono, Andriazis Dahono</p> <p>School of Electrical Engineering and Informatics, Institut Teknologi Bandung Bandung, Indonesia</p>	1
PS1-3	147	<p>Research Trends in Online Partial Discharge Monitoring and Diagnosis Utilizing ICT in Electric Power Equipment</p> <p>Masayuki Hikita, Masahiro Kozako</p> <p>Department of Electrical and Electronics Engineering, Kyushu Institute of Technology, Kitakyushu, Japan</p>	6
PS1-4	149	<p>Research on insulation defect localization technology of power equipment</p> <p>Guanjun Zhang, Xiaochang Hua, Haotian Zhang, Dingge Chang, Haibao Mu</p> <p>State Key Lab of Electrical Insulation and Power Equipment, Xi'an Jiaotong University, Xi'an, China</p>	14
PS1-5	99	<p>Potential of Biomass as RE Source for Sustainable Electricity Supply in Eastern Indonesia</p> <p>Tumiran¹, Mohammad Na'iem², Sarjiya³, Lesnanto Multa Putranto⁴, Tomy Listyanto⁵, Adi Priyanto⁶, Ahmad Adhiim Muthahhari⁷ and Rizki Firmansyah Setya Budi⁸</p> <p>^{1,3,4,7,8}Department of Electrical and Information Engineering, Universitas Gadjah Mada, Yogyakarta, Indonesia ²Department of Silvikultur, Universitas Gadjah Mada, Yogyakarta, Indonesia ⁵Department of Forest Products Technology, Universitas Gadjah Mada, Yogyakarta, Indonesia ⁶System Planning Division, PT. PLN (Persero), Jakarta, Indonesia</p>	22
PS2-3	158	<p>An Approach for Quantifying Risk of Asset Failure in a Power System Business</p> <p>A.P. Purnomoadi¹, A. Pharmatrisanti², S. Rositawati³, M.P. Marbun⁴, A.S. Surya⁵, H. Nugraha⁶, I. Arifianto⁷, D.F. Hakam⁸ and A.M.J. Simatupang⁹</p> <p>^{1,6,7,8}Center of Excellence, PLN Indonesia, Jakarta, Indonesia ²Finance & Risk Mgmt. Directorate, PLN Indonesia, Jakarta, Indonesia ³Jawa-Bali Load & Dispatch Center, PLN Indonesia Jakarta, Indonesia ⁴System Planning Division, PLN Indonesia, Jakarta, Indonesia ⁵PLN Research Institute, PLN Indonesia, Jakarta, Indonesia ⁹IT System Division, PLN Indonesia, Jakarta, Indonesia</p>	28
PS2-4	91	<p>Application of Polarization and Depolarization Current Measurement for Rotating Machine Insulation Analysis</p> <p>Norasage Pattanadech¹, P. Nimsanong², and T. Worthong³</p> <p>¹Department of Electrical Engineering, School of Engineering, King Mongkut's Institute of Technology, Ladkrabang, Bangkok, Thailand ²Power System Operation and Control Section 2, Power System Control Dept. Metropolitan Electricity Authority, Bangkok, Thailand ³Maintenance Electrical Section, Manager - Maintenance Electrical, Phase 3-5 Coal Fired Units, Global Power Synergy Public Co., Ltd., Rayong, Thailand</p>	34

Session Number	Paper No.	Title, Author & Institution	Page
PS2-5	156	<p>Understanding of Outdoor Insulator Characteristics through Leakage Current and Electrical Equivalent Circuit</p> <p>Suwarno</p> <p>School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Bandung, Indonesia</p>	39
PS3-1	153	<p>An Effective Damping Control Scheme to Improve Inter-Area Power System Stability</p> <p>A. Abu-Siada¹, Suwarno², Nanang Hariyanto³, Fathin Saifur Rahman⁴, Muhammad Ruswandi Djalal⁵, Joko Hartono⁶, Rathy Shinta Utami⁷ and Luky Handayani⁸</p> <p>¹Electrical and Computer Engineering Department, Curtin University Perth, Australia ^{2,3,4,7,8}School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Bandung, Indonesia ⁵Department of Energy Engineering, Politeknik Negeri Ujung Pandang, Makassar, Indonesia ⁶Transmission and Distribution Department, PT PLN Research Institute Jakarta, Indonesia</p>	45
PS3-2	154	<p>Towards the 2nd edition of IEC 60034-18-41: challenges and perspectives</p> <p>Alberto Rumi, Jacopo Marinelli and Andrea Cavallini*</p> <p>Dept. of Electrical, Electronic and Information Engineering “Guglielmo Marconi”, University of Bologna, Bologna, Italy</p>	52
PS3-3	148	<p>Charge Trap Spectroscopies in Polymer Dielectrics: Application to BOPP</p> <p>Gilbert Teyssedre¹, Duvan Mendoza-Lopez², Christian Laurent³, Laurent Boudou⁴, Laurent Berquez⁵ and Feihu Zheng⁶</p> <p>^{1,2,3,4,5}Laplace, CNRS and University Paul Sabatier Toulouse, Toulouse, France ⁶Department of Electrical Engineering, Tongji University, Shanghai, China</p>	57
PS3-5	163	<p>Influence of Corona Ageing on Electrical and Mechanical Behaviour of Epoxy Micro-Nanocomposites</p> <p>Myneni Sukesh Babu¹, R. Sarathi^{2*}, Takahiro Imai³</p> <p>^{1,2}Department of Electrical Engineering, Indian Institute of Technology Madras Chennai, India ³Infrastructure Systems Research and Development Center, Toshiba Infrastructure Systems & Solutions Corporation, Toshiba-cho, Fuchu-shi, Tokyo, Japan</p>	65
PTS1-1_1	39	<p>Study on Equivalent Circuit of Epoxy Resin Insulators based on Leakage Current Waveforms Under Clean Fog Conditions</p> <p>Adjie Bagaskara, Suwarno</p> <p>School of Electrical Engineering and Informatics, Institut Teknologi Bandung Bandung, Indonesia</p>	69
PTS1-1_2	80	<p>Study of Leakage Current Characteristics of High Voltage Insulators Ageing After Dry Season in Polluted Environmental Conditions</p> <p>Salama Manjang, Syafaruddin, Tambi, Mustarum Musaruddin, Ikhlas Kitta</p> <p>Department of Electrical Engineering Hasanuddin University Makassar, Indonesia, Department of Electrical Engineering, Halu Oleo University Kendari, Indonesia</p>	74

Session Number	Paper No.	Title, Author & Institution	Page
PTS1-1_3	21	<p>Effect of Artificial Aging on Silicone Rubber Polymeric Insulators Performance at Various Environmental Conditions</p> <p>Adib Akbar Jaelani, Shafa Nabila Haya, Suwarno, Lunnetta Safura L.</p> <p>School of Electrical and Informatics Engineering Bandung Institute of Technology Ganeca St. 10, Bandung, 40132, Indonesia</p>	79
PTS1-1_4	30	<p>Effects of UV Radiation and Contaminant on The Properties of Polymeric Insulator</p> <p>Muhammad Ridhwan, Lunnetta Safura Lumba, Suwarno</p> <p>School of Electrical Engineering and Informatics, Institut Teknologi Bandung Bandung, Indonesia</p>	85
PTS1-1_5	27	<p>Accelerated Aging Study on Silicone Rubber Insulator with Contaminant Level and Fog Conductivity Variations</p> <p>Shafa Nabilla Haya, Adib Akbar Jaelani, Lunnetta Safura Lumba, Suwarno</p> <p>School of Electrical Engineering and Informatics, Institut Teknologi Bandung Bandung, Indonesia</p>	91
PTS1-2_1	111	<p>Enhancing the Power and Efficiency of Photovoltaic Panel Using Heat Sinks with fans</p> <p>Zaid Khudhur Hussein¹, Jenan Ayad², Hanan j. Abdulkareem³ Hadi Jameel Hadi⁴</p> <p>^{1,3}Medical Instrumentation Technical Engineering, Al-Esraa University College Baghdad, Iraq; ²Computer Technology Engineering, Al-Esraa University College Baghdad, Iraq ; ⁴Electrical Engineering Department Oil Products Distribution Company Baghdad, Iraq</p>	96
PTS1-2_2	82	<p>Design A Low-cost PV Performance Ratio Data Monitoring</p> <p>Yuli Astriani, Dionysius A. Renata, Khotimatul Fauziah, Asih Kurniasari, Hafsa Halidah, Riza</p> <p>National Laboratory for Energy Conversion Technology, BPPT Tangerang Selatan, Indonesia</p>	102
PTS1-2_3	61	<p>Hourly Day-ahead Solar Energy Prediction For Supporting Smart Grid Implementation in Semau Island</p> <p>Ignatius Rendroyoko¹, Hugo Hadi Suhana², Yvon Besanger³</p> <p>¹School of Electrical Engineering and Informatics, Institut Teknologi Bandung Bandung, Indonesia, PT. Icon+ Jakarta, Indonesia ²Electrical Engineering, Trisakti University, PT. Icon+ Jakarta, Indonesia ³Univ. Grenoble Alpes, CNRS, Grenoble, INP, Grenoble, France</p>	108
PTS1-2_4	62	<p>Analysis of Thermal Storage Temperature Control for Solar Thermal Power Plant</p> <p>Fauzi Handy Dewanto, Burhanuddin Halimi</p> <p>School of Electrical and Informatic, Institut Teknologi Bandung, Bandung, Indonesia</p>	112
PTS1-2_5	129	<p>Design of Defense Scheme Based on Adaptive Under Frequency Load Shedding (AUFLS) at Lombok Island Grid System</p> <p>Dede Rilwan Alwaini, Hasna Satya Dini</p> <p>Faculty of Electricity and Renewable Energy Institut Teknologi PLN Jakarta, Indonesia</p>	117

Session Number	Paper No.	Title, Author & Institution	Page
PTS1-3_1	97	<p>Characteristics of Dissolved Gas Evolution Rate under Different Loading Factors</p> <p>Heri Sutikno¹, Rahman Azis Prasajo², Suwarno³</p> <p>¹Human Talent Development Department, PT PLN (Persero) Jakarta, Indonesia. ²Department of Electrical Engineering Politeknik Negeri Malang, Indonesia. ³School of Electrical Engineering and Informatics, Institut Teknologi Bandung Bandung, Indonesia</p>	122
PTS1-3_2	144	<p>Finite Element Analysis of Electric Field Distribution in C4F7N as an Alternative to SF6 for Electrical Insulation</p> <p>Rizwan Ahmad¹, Rahisham Abd Rahman², Ali Ahmed Salem³, Nor Akmal Mohd Jamail⁴, Azhan Ab Rahman⁵, Haziha Abdul Hamid⁶</p> <p>^{1,2,4}Department of Electrical Power Engineering, Universiti tun Hussein Onn Malaysia ³Institute of High Voltage and High Current, Universiti Teknologi Malaysia, Skudai Johor ⁵Faculty of Electrical and Electronic Engineering Technology, Universiti Teknikal Malaysia, Melaka ⁶School of Electrical System, Universiti Malaysia Perlis Arau, Malaysia</p>	126
PTS1-3_3	133	<p>Design and implementation of Experimental Setup for Measurement of Partial Discharge on GIS</p> <p>Arpan Zaeni, Burhanuddin Halimi, Umar Khayam, Suwarno</p> <p>School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Bandung, Indonesia</p>	132
PTS1-3_4	108	<p>Determination of Insulating Properties of SO₂ gas from BOLSIG+ Calculated Swarm Transport Coefficients</p> <p>Akhilesh Kumar Pandey¹, Pushpendra Singh², Mohd. Shahnawaz Khan³, Jitendra Kumar Singh⁴</p> <p>^{1,2,4}Deptt of Electrical Engineering, Institute of Engineering & Technology J K Lakshmiapat University, Jaipur India ³Deptt of Chemistry, Institute of Engineering & Technology J K Lakshmiapat University Jaipur India</p>	137
PTS1-4_1	65	<p>Generation and Transmission Expansion Planning in Remote Areas by considering Renewable Energy Policy and Local Energy Resources: The Case Study of Jayapura Power System</p> <p>Tumiran¹, Sarjiya², Lesnanto Multa Putranto³, Edwin Nugraha Putra⁴, Rizki Firmansyah Setya Budi⁵, Candra Febri Nugraha⁶</p> <p>^{1,2,3,5,6}Department of Electrical and Information Engineering Universitas Gadjah Mada Yogyakarta, Indonesia ⁴System Planning Division PT PLN (Persero) Jakarta, Indonesia</p>	143
PTS1-4_2	165	<p>Optimized Allocation of Solar PV in Batam-Bintan Power System 2021-2025</p> <p>Devni Syafrianto, Kevin Marojahan Banjar-Nahor, Nanang Hariyanto</p> <p>School of Electrical Engineering & Informatics Institut Teknologi Bandung Bandung, Indonesia</p>	149
PTS1-4_3	120	<p>Micro-Spatial Electricity Planning in Urban Area Based on Energy Demand</p> <p>Oktaria Handayani¹, Adri Senen², Christine Widyastuti³, Dian Yayan Sukma⁴</p> <p>^{1,2,3}Department of Electrical Engineering Institut Teknologi PLN Jakarta, Indonesia ⁴Department of Electrical Engineering Universitas Riau Pekanbaru, Indonesia</p>	155

Session Number	Paper No.	Title, Author & Institution	Page
PTS1-4_4	162	<p>Thermal Valorization of the LED by a Thermoelectric Generator</p> <p>Ahlem Ben Halima¹, Zouhour Araoud², Laurent Canale³, Kamel Charrada⁴, Georges Zissis⁵</p> <p>^{1,2,4}Research Unit of Ionized and Reactive Media (EMIR) Monastir, Tunisia ^{3,5}IEEE Senior Member, LAPLACE, Université de Toulouse, CNRS, INPT, UPS, Toulouse, France</p>	161
PTS1-4_5	92	<p>Development of Smart Outlet for Active Power Usage</p> <p>Lei Xiong¹, Goro Fujita², Takashi Minemura³</p> <p>^{1,2}Power System Lab, Shibaura Institute of Technology Tokyo, Japan ³President and Representative Director, Minemura Electrical Engineering Corp Nagano, Japan</p>	166
PTS1-4_7	155	<p>Developing an Innovative Strategy to Achieve Energy Saving for Air Conditioning</p> <p>Marwan Marwan¹, Tri Harianto², Dahlang Tahir³</p> <p>¹Electrical Engineering Department Polytechnic State of Ujung Pandang Makassar Indonesia ²Civil Engineering Department Hasanuddin University Makassar, Indonesia ³Physics Department Hasanuddin University Makassar, Indonesia</p>	170
PTS1-4_8	160	<p>Review of Recent Research on Energy Saving Lamp in Indonesia</p> <p>Umar Khayam, Arpan Zaeni</p> <p>School of Electrical Engineering and Informatics Institut Teknologi Bandung Bandung, Indonesia</p>	175
PTS2-1_1	32	<p>Effects of Loading Factor on the Condition of Insulating Paper in Power Transformer</p> <p>Nuriyanto Eko Saputro, Rahman Azis Prasajo, Geby Chintia, Suwarno</p> <p>School of Electrical Engineering & Informatics Bandung Institute of Technology, Bandung, Indonesia</p>	181
PTS2-1_2	118	<p>Application and Comparative Analysis of Fuzzy Inference System for Transformer Fault Diagnosis with Dissolved Gases in Oil</p> <p>Mehmet Murat Ispirli¹, Hasan Adali², Özcan Kalenderli³, Mehmet Zeki Celik⁴, Bülent Oral⁵</p> <p>^{1,3}Dept. of Electrical Engineering Istanbul Technical University Istanbul, Turkey ²Field Engineering BEST Transformer Corp., Balikesir, Turkey ⁴Live Line Maint. Engineering of Head, Turkish Electricity Trans. Corp, Istanbul, Turkey ⁵Dept. of Electrical-Electronics Engineering Marmara University, Istanbul, Turkey</p>	187
PTS2-1_3	100	<p>High Voltage Insulation Failure on HV Current Transformer: A Case Study in Diagnosis of HV CT Failure at Bekasi 150 kV Substation</p> <p>I Gusti Ngurah Mahendrayana, Imam Makhfud, Arfan Idha Norgiyanto, Zainur Oktafian Prabandaru, Winarno</p> <p>Transmission Maintenance Division PT PLN (Persero) West Java Transmission Unit Depok, Indonesia.</p>	191
PTS2-1_4	16	<p>Oil Insulation Analysis due to Electrical Arcing of Power Transformers Degradation</p> <p>Syahputra, Muhammad Rully; Prasetyo, Mirza Farhan; Sufianto, Abdul Muiz; Septyani, Henny Ika</p> <p>Maintenance Division UIT JBT PT. PLN (Persero) Bandung, Indonesia.</p>	197

Session Number	Paper No.	Title, Author & Institution	Page
PTS2-1_5	37	Cost and Benefit Analysis on Treatment Method of Aged Power Transformer Insulating Oil Harry Gumilang Maintenance Department PLN Unit Induk Transmisi Jawa Bagian Tengah, Bandung, Indonesia.	203
PTS2-1_6	29	Nursing Sick Transformers Using Online Dissolved Gas Monitors Bhaba Das Transformers Business Unit Hitachi ABB Power Grids Singapore	207
PTS2-2_1	31	Solar PV-Wind Turbine Integration in Hydrogen Production to Generate Electricity through Fuel Cell Syahril A. Ginanjar, Burhanuddin Halimi, Arwindra Rizkiawan School of Electrical Eng. & Informatics Bandung Institute of Technology	211
PTS2-2_2	45	Integration of Large-Scale Photo-Voltaic Based Generation into Power Systems Muhammad A. Tayyab Dept of Elec. & Computer Engineering, Auburn University, Auburn, Alabama, USA	217
PTS2-2_3	136	System Optimization Design Of Rooftop Grid-Tied Solar Power Plant For Residential Customers In Indonesia Naftalin Winanti ¹ , CH A Andre Mailoa ² , Handoko Rusiana Iskandar ³ , Giri Angga Setia ⁴ , Nivika Tiffany Somantri ⁵ ^{1,3,4,5} Electrical Engineering Department Faculty of Engineering Universitas Jenderal Achmad Yani Cimahi, Indonesia ² Faculty of Mathematic and Natural Science Bandung Institute of Technology Bandung, Indonesia	222
PTS2-2_4	137	Optimization of the Hybrid Power Plant Design (PV-Wind) for Residential Load Giri Angga Setia, Ziega Zetu Zaen, Fauzia Haz, Handoko Rusiana Iskandar, Naftalin Winanti, M Reza Hidayat Electrical Engineering Department, Faculty of Engineering Universitas Jenderal Achmad Yani Cimahi, Indonesia	227
PTS2-2_5	9	Steady State Load Flow Model of DFIG-Based Wind Turbine in Voltage Control Mode Rudy Gianto Department of Electrical Engineering Tanjungpura University Pontianak, Indonesia	232
PTS2-2_6	76	Characterizing a 40-MW Modern Wind Power Plant by Field Data Measurements Thoa Le Thanh ¹ , Eduard Muljadi ² , Dieu Vo Ngoc ³ , Irving Paul Girsang ⁴ ^{1,3} Dept. of Power Systems Ho Chi Minh City University of Technology, Vietnam National University Ho Chi Minh City ^{2,4} Dept of Electrical and Computer Engineering, Auburn University, Alabama, United States	236

Session Number	Paper No.	Title, Author & Institution	Page
PTS2-3_1	24	Effects of Notches in GIS Spacer Design to Hold Conductor Rods on Electric Field Distribution Muhammad R. Fabio, Syarif Hidayat, Umar Khayam Department of Electrical Power Engineering, School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Bandung, Indonesia.	241
PTS2-3_2	26	Analysis of Bentonite AC and DC Performance Under Water Content and Chemical Content Variation for Grounding Applications Zakka Izzatur Rahman Noor, Bambang Anggoro Soedjarno P, Pradita Octoviandiningrum Hadi Electrical Power Engineering School of Electrical Engineering and Informatics, Bandung Institute of Technology, Bandung, Indonesia.	247
PTS2-3_4	25	Study of Transmission Lightning Protection Installation in South Sumatera A S Habibie, M Ridwan, K G H Mangunkusumo, Sriyono, A S Surya, D R Jintaka Ristek TND PLN Research Institute, Jakarta Indonesia.	253
PTS2-3_5	141	Installation of Multi Chamber Arrester to Improve Lightning Reliability Performance of Distribution Lines System in Oil and Gas Area Syadila Refiasto, Bryan Denov, Suwarno, Reynaldo Zoro School of Electrical Engineering and Informatics Institut Teknologi Bandung, Bandung, Indonesia.	258
PTS2-3_6	81	500 kV Quadruple Circuit Compact Transmission Line Redesign Study To Reduce The Impact Of Lightning Strikes Joko Hartono, Muhammad Ridwan, Muhammad Muslih Mafruddin, Hakim Habibi, Erny Anugrahany Transmission and Distribution Department, PLN Research Institute, Jakarta, Indonesia	263
PTS2-4_1	122	Micro-Spatial Projection Of Energy Demand Based On Dominant Factors Identification: An Exploratory Factor Analysis Dwi Anggaini, Adri Senen, Hasna Satya Dini Teknik Elektro Institut Teknologi PLN Jakarta, Indonesia	268
PTS2-4_2	10	Electricity Consumption Management System Design using Load Scheduling Method Based on Internet Of Things Zaini, Adelina Utari Faculty of Engineering Andalas University Padang, Indonesia	273
PTS2-4_3	22	Comparative Power and Energy Consumptions between Scheduled and Fuzzy Controlling on an IoT-based Vertical Farming Waluyo, Andre Widura, Febrian Hadiatna, Delvin Anugerah Department of Electrical Engineering Institut Teknologi Nasional Bandung (ITENAS) Bandung, Indonesia	278

Session Number	Paper No.	Title, Author & Institution	Page
PTS2-4_4	126	<p>The influence of Wall on Reducing Electrical Energy Consumption for Residential Building</p> <p>Marwan Marwan¹, Tri Harianto², Dahlang Tahir³</p> <p>¹Electrical Engineering Department Polytechnic State of Ujung Pandang Makassar, Indonesia ²Civil Engineering Department Hasanuddin University Makassar, Indonesia ³Physics Department Hasanuddin University Makassar, Indonesia</p>	283
PTS2-4_5	152	<p>Economic and Environmental Assessment of the Implementation of Hybrid Auto-size Diesel Generators with Renewable Energy on Sebesi Island</p> <p>Ali Muhtar¹, Purwono Prasetyawan², Sabhan Kanata³, Syamsyarief Baqaruzi⁴ and Toto Winata⁵</p> <p>^{1,2,3,4}Electrical Engineering, Center of Research & Innovation for Conservation & Renewable Energy Institut Teknologi Sumatera Lampung, Indonesia ⁵Department of Physic Faculty of Math and Science Institut Teknologi Bandung Bandung, Indonesia</p>	288
PTS2-4_6	33	<p>Strategy Plan on Electric Vehicle Charging Scheme for Peak Demand Reduction in Residential Area Transformer</p> <p>Komaruddin^{1,2}, Suwarno¹, Nanang Hariyanto¹, Kevin M. Banjar-Nahor¹</p> <p>¹School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Indonesia ²PT PLN (Persero), Jakarta, Indonesia</p>	294
PTS2-4_7	151	<p>Minimizing Electrical Energy Costs for Residential Buildings Based on the Characteristic of Walls</p> <p>Marwan Marwan¹, Tri Harianto², Dahlang Tahir³</p> <p>¹Electrical Engineering Department Polytechnic State of Ujung Pandang Makassar, Indonesia ²Civil Engineering Department Hasanuddin University Makassar, Indonesia ³Physics Department Hasanuddin University Makassar, Indonesia</p>	300
PTS2-4_8	124	<p>Financial and Technical Forecast Analysis of a Hybrid Biomass-Diesel Power Plant - Case Study in Tinggi Island, South Bangka</p> <p>Ginas Alvianingsih¹, Vendy Antono², Iwa Garniwa³</p> <p>¹Faculty of Electricity and Renewable Energy Institut Teknologi PLN Jakarta, Indonesia ²Faculty of Energy Technology and Bussiness Institut Teknologi PLN Jakarta, Indonesia ³Departement of Electrical Engineering Universitas Indonesia Depok, Indonesia</p>	305
PTS3-1_1	127	<p>The Study of Electric Field and Partial Discharges on XLPE Insulation under DC High Voltage using COMSOL Multiphysics</p> <p>Apoorva Sahu, Rakesh Sahoo, and Subrata Karmakar</p> <p>Department of Electrical Engineering, National Institute of Technology Rourkela Rourkela, India</p>	309
PTS3-1_2	42	<p>FTIR and SEM Analysis of Breakdown XLPE Cable Insulation</p> <p>Hakim Habibi, Aji Suryo Alam, Oksa Prasetyawan, Guntur Supriyadi</p> <p>Transmission and Distribution Dept, PLN Puslitbang, Jakarta, Indonesia.</p>	314

Session Number	Paper No.	Title, Author & Institution	Page
PTS3-1_3	142	<p>Study The Properties of Mixed Kenaf and Empty Fruit Bunch (EFB) Oil Palm Fibre Insulation Paper</p> <p>Ja'afar Bin Adnan¹, Mohd Taufiq Bin Ishak², Nurul 'Izzati Binti Hashim³, Fakroul Redzuan Bin Hashim⁴, Rushdan Bin Ibrahim⁵, Rahisham Abd Rahman⁶</p> <p>^{1,2,4}Dept. of Electrical and Electronics Engineering, Faculty of Engineering, National Defence University of Malaysia Kuala Lumpur, Malaysia; ³Dept. of Electrical and Electronics Engineering, Faculty of Engineering, University Malaysia Sarawak Sarawak, Malaysia; ⁵Pulp and Paper Laboratory, Forest Research Institute Malaysia, Selangor Malaysia; ⁶Faculty of Electrical and Electronics Engineering, Univeriti Tun Hussein Onn Malaysia, Johor Malaysia</p>	318
PTS3-1_4	44	<p>Comparative Study of Accelerated Thermal Aging of Papers in Mineral Oil, Natural Ester, and Gas-to-Liquid</p> <p>Ilhamid Daris, Mawla Ahmad, Hardiansyah Rahmat Nurhakim, Suwarno</p> <p>School of Electrical Engineering and Informatics Bandung Institute of Technology, Bandung, Indonesia</p>	323
PTS3-2_1	53	<p>Power Quality Study of Microgrid with Single Large Solar PV and Distributed Small Solar PVs Plant: Case Study Karampuang Island</p> <p>Ridho Arisyadi, Tri Desmana Rachmilda, Deny Hamdani</p> <p>School of Electrical Engineering and Informatics Institut Teknologi Bandung Bandung, Indonesia</p>	329
PTS3-2_3	70	<p>Military Microgrid in Indonesia</p> <p>Dianing Novita Nurmala Putri, Eddie Widiono Suwondo, Syamsir Abduh, Tyas Kartika Sari, Chairul G Irianto, Maula Sukma Widjaya</p> <p>Electrical Engineering Department Universitas Trisakti Jakarta, Indonesia</p>	335
PTS3-2_4	63	<p>Design and Analysis of Hybrid Off-Grid PV-Battery-Genset System for Communal and Administrative Load Under Cycle Charging Control Strategy at Patippi Village, Papua</p> <p>Abdu Yakan Rosyadi, Agus Purwadi, Muhammad Ridhwan</p> <p>School of Electrical Engineering and Informatics, Institut Teknologi Bandung Bandung, Indonesia</p>	339
PTS3-2_5	64	<p>Analysis of Hybrid Diesel-Biogas for Palm Oil Mill Electrification and Environmental Sustainability</p> <p>Syaffii, Pinto Anugrah, Dewi Kusuma Wardani</p> <p>Electrical Engineering Department, Engineering Faculty, Universitas Andalas Padang, Indonesia</p>	345
PTS3-2_6	134	<p>Optimal Design of Rooftop PV Systems for Electrical Engineering Department Laboratory</p> <p>Handoko Rusiana Iskandar¹, Nana Heryana², Naftalin Winanti³, Giri Angga Setia⁴, Rijal Ridwanulloh⁵, Muhammad Rizky Alfarizi⁶</p> <p>^{1,3,4,5,6}Electrical Engineering Department, Faculty of Engineering, Universitas Jenderal Achmad Yani Cimahi, Indonesia</p> <p>²School of Electrical Engineering and Informatics, Institut Teknologi Bandung Bandung, Indonesia</p>	349

Session Number	Paper No.	Title, Author & Institution	Page
PTS3-2_7	168	Adaptive Protection Coordination Scheme for Distribution System Under Penetration of Distributed Generation Ra Crystal S. P. Tambun, Kevin M. Banjar-Nahor, Nanang Hariyanto, Fathin Saifur Rahman, Rizky Rahmani School of Electrical Engineering and Informatics Institut Teknologi Bandung Bandung, Indonesia.	355
PTS3-3_1	170	Near Real-Time Power System Simulation in SCADA Muhammad Mushthofa Musyasy, Kevin Marojahan Banjar Nahor, Nanang Hariyanto Electrical Power Engineering School of Electrical Engineering and Informatics Bandung Institute of Technology, Bandung, Indonesia	361
PTS3-3_3	145	Study on the Use of Virtual Synchronous Generators to Improve Large Scale System's Stability Diya Li ¹ , Sandro Sitompul ² , Goro Fujita ³ ¹ Electrical Engineering and Computer Science Shibaura Institute of Technology Tokyo, Japan ² Regional Environment System Shibaura Institute of Technology, Tokyo Japan ³ Department of Electrical Engineering Shibaura Institute of Technology Tokyo, Japan	367
PTS3-3_4	128	Design of Load Balancing Method On Secondary Distribution Network Using Artificial Intelligence Based On Fuzzy Logic Rivzky Prananda, Hasna Satya Dini, Tri Wahyu Oktaviana Putra Faculty of Electricity and Renewable Energy Institut Teknologi PLN Jakarta, Indonesia	372
PTS3-3_5	125	System Out of Step Evaluation on Java-Bali EHV System during Double Line Transmission Disturbance Hariadi Aji, Yonny Wicaksono, Putranusa Perkasa, Zilfa Hasanita Natalia, Aan Nur Arifin, M Nugratama Sudarsanto, Jarot Setyawan, Yenni Tarid Java Bali Load Dispatch Center PT.PLN (Persero) Depok, Indonesia.	378
PTS3-3_6	56	Virtual Synchronous Generator Control Considering Output Upper Limitation Yuki Hayashi ¹ , Sandro Sitompul ² , Goro Fujita ³ ^{1,2} Graduate School of Engineering and Science Shibaura Institute of Technology, Tokyo, Japan ³ College of Engineering Shibaura Institute of Technology Tokyo Japan	383
PTS3-3_7	171	Optimized Hybrid Power System Configuration for The First Phase of Dedieselization Programs Devni Syafrianto ¹ , Kevin Marojahan Banjar-Nahor ² , Herry Nugaraha ³ , Dzikri Firmansyah Hakam ⁴ , Pradita Octaviandiningrum Hadi ⁵ , Nanang Hariyanto ⁶ ^{1,3,4} Centre of Excellence for Generation & Renewable Energy PT PLN (Persero) Jakarta, Indonesia ^{2,5} School of Electrical Engineering & Informatics Institut Teknologi Bandung Bandung, Indonesia	387
PTS3-4_1	40	Assesment Procedure for Advanced Metering Infrastructure Implementation in Indonesia Erny Anugrahany, Guntur Supriyadi, Dimas Aji Nugraha, Oksa Prasetyawan W., M. Muslih Mafruddin Transmission and Distribution R&D PLN Puslitbang Jakarta, Indonesia	393
PTS3-4_2	35	Meter Operation Center Design using Rapid Application Development Technique to Support AMI Implementation Ignatius Rendroyoko ¹ , Antonius Padedda ² , Rudy Setyobudi ³ , Iskandar Nungtjik ⁴ ¹ Electricity & W.Business Indonesia Comnets Plus Jakarta, Indonesia ² Electricity Digital Solution Indonesia Comnets Plus Jakarta, Indonesia ³ Smart Meter PT PLN (Persero) Jakarta, Indonesia ⁴ Energy metering expert Indonesia Comnets Plus Jakarta, Indonesia	398
PTS3-4_3	107	Development of Meter Data Management System Based-on Event-Driven Streaming Architecture for IoT-based AMI Implementation Ignatius Rendroyoko ¹ , Antonius Darma Setiawan ² , Suhardi ³ ^{1,3} School of Electrical Engineering and Informatics Institute Technology of Bandung Bandung, Indonesia ² Department of Electrical Engineering Jakarta Global University Jakarta, Indonesia	403

Session Number	Paper No.	Title, Author & Institution	Page
PTS3-4_4	15	<p>Guidance on Communication Media Selection for Advanced Metering Infrastructure in Indonesia</p> <p>K.G.H. Mangunkusumo, A.S. Surya, D.R. Jintaka, H.B. Tambunan</p> <p>Transmission and Distribution Department PLN Research Institute Jakarta, Indonesia</p>	408
PTS3-4_5	14	<p>NB-PLC Performance Evaluation for Advanced Metering Infrastructure</p> <p>K.G.H. Mangunkusumo, A.S. Surya, D.R. Jintaka, H.B. Tambunan</p> <p>Transmission and Distribution Department PLN Research Institute Jakarta, Indonesia</p>	414
PTS4-1_1	113	<p>Application of the Phase Shift Full Bridge Converter for the Single-Phase Full-Bridge Inverter to Improve the Output of the Renewable Energy</p> <p>Thao Huynh Van¹, Thanh Le Van², Tuyet Mai Nguyen Thi³, Minh Quan Duong⁴, Le Xuan Chau⁵</p> <p>^{1,2,3,4}University of Science and Technology, The University of Danang Danang, Vietnam</p> <p>⁵Naval Academy Vietnam Nhatrang Vietnam</p>	419
PTS4-1_2	109	<p>Design of AC Electric Vehicle Supply Equipment based on Safety Standard</p> <p>Khotimatul Fauziah¹, Yuli Astriani², Dionysius A. Renata³, Afrias Sarotama⁴, Agus Suhendra⁵, Eka R. Priandana⁶, Riza⁷</p> <p>^{1,2,3,5,6,7}National Laboratory for Energy Conversion Technology BPPT Serpong, Indonesia</p> <p>⁴Center of Technology for Electronics BPPT Serpong, Indonesia</p>	425
PTS4-1_3	59	<p>A Model Reference Adaptive System for Online Rotor Parameter Estimation of Induction Motors</p> <p>Ikhwan Wiranata, Jihad Furqani, Arwindra Rizqiawan, Pekik Argo Dahono</p> <p>School of Electrical Engineering and Informatics Institute Technology of Bandung Bandung, Indonesia</p>	431
PTS4-1_4	47	<p>Detection of Air Gap Eccentricity On Three-Phase Induction Motor Using 3-Axis Digital ELF Gaussmeter</p> <p>Reza Sarwo Widagdo, Dimas Anton Asfani, I Made Yulistya Negara</p> <p>Department of Electrical Engineering Institut Teknologi Sepuluh Nopember Surabaya, Indonesia</p>	436

PTS5-4_2	46	An Overview of Reliability and Power Quality of Distribution Network due to Penetration of Rooftop Photovoltaic System and Plug-in Electric Vehicle Dhandis R. Jintaka, K. G. H. Mangunkusumo, Putu Agus Aditya Pramana Transmission and Distribution Department PLN Research Institute Jakarta, Indonesia	630

Session Number	Paper No.	Title, Author & Institution	Page
PTS5-4_3	67	A Voltage Rise Mitigation Control Scheme of Utility-Scale Battery in High PV Penetration Wijaya Yudha Atmaja, Sarjiya, Lesnanto Multa Putranto Department of Electrical and Information Engineering Universitas Gadjah Mada Yogyakarta, Indonesia	634
PTS5-4_4	130	Study of Power Quality Problems for Improving The Quality of Electricity in Java: Case Study of East Java Regional Industry Customers with Power Greater Than 30 MVA A. S. Habibie, M. Ridwan, D. R. Jintaka Ristek TND PLN Research Institute Jakarta, Indonesia	640
PTS5-4_5	41	Backward Forward Sweep Algorithm for Unbalanced Three-Phase Power Flow Analysis in Distribution Systems Containing Voltage Regulator Taqiyuddin, Suwarno, Gibson H. M. Sianipar, Muhammad Nurdin School of Electrical Engineering and Informatics Institute of Technology Bandung Bandung, Indonesia	645
PTS5-4_6	60	Performance Analysis of Offshore Floating PV Systems in Isolated Area Radhiansyah, Tri Desmana Rachmilda, Deny Hamdani School of Electrical Engineering and Informatics Institut Teknologi Bandung, Bandung, Indonesia	651

THE 3RD INTERNATIONAL CONFERENCE ON HIGH VOLTAGE ENGINEERING AND POWER SYSTEMS

Bandung, 5 - 6 OCTOBER **2021**

- Virtual Conference -

Important Dates

- Abstract Submission : June 15, 2021
 Notification : June 25, 2021
 Full Paper Submission : July 25, 2021

Invited Speakers

Prof. Masayuki Ikita
 (Senior Lecturer of Technology, Japan)

Prof. Gao-Jun Zhang
 (Jilin Jianzhu University (JIT), Jilin, China)

Dr. Masang Hariyanto
 (Indonesian Institute of Technology, Indonesia)

Prof. H. Sarathi
 (UJ Mahara, India)

Dr. Suniran
 (Universitas Gadjah Mada, Indonesia)

Prof. Ahmed Abu Sindi
 (Yamalo University, Jordan)

Prof. Andrea Cavallini
 (University of Bologna, Italy)

Prof. Utaga Mahawati
 (Lampung University, Indonesia)

Prof. Suwarno
 (Doctor Education Bandung, Indonesia)

Prof. Gilbert Tegeandro
 (ITS, UPTAD, Indonesia, France)

Prof. Norasaga Pattanajak
 (King Mongkut's Institute of Technology
 Ladkrabang, Thailand)

Prof. Pekik Agro Cahana
 (Indonesian Institute of Technology, Indonesia)

Dr. Andreas Putra Purwasandi
 (ITS ITS Indonesia Institute of Technology,
 Indonesia)

Prof. Eduard Mujaly
 (Universitas Indonesia, Indonesia, US)

Main Topics

- High Voltage Generation, Measurement, and Instrumentation
- High Voltage Insulation System
- Condition monitoring and diagnosis for power equipments and power systems
- Dielectric materials and their aging mechanisms
- New and environmental friendly materials for high voltage application
- Application of high voltage in industry
- Degradation assessment for power equipment
- Transients Phenomena
- Outdoor Insulation: Insulator, Environmental Effects
- High Voltage Insulation for HVAC and HVDC System
- High Voltage Apparatus: Reliability and Maintenance
- Grounding system
- Power Quality
- Electromagnetic Compatibility
- Smart Grid Technology
- High Voltage Engineering Education
- Power system planning, operation and control
- Power system stability

All accepted papers will be indexed in IEEE Explore and Scopus

General Chair :
 Suwarno
General Secretary:
 Umar Khayam

School of Electrical Engineering and Informatics
 Institut Teknologi Bandung
 Jl. Darmasri 10, Bandung 40132, Indonesia
 Phone : +62-800-5006-6006 (Online) /

ICHVEPS 2021 Organization

General Chair :
Suwarno (ITB, Indonesia)
General Secretary :
Umar Khayam (ITB, Indonesia)
Treasurer :
Fathin Saifur Rahman (ITB, Indonesia)

Publications :
Chair : **Deny Hamdani (ITB, Indonesia)**
Member :
Lunnetta Safura (ITB, Indonesia)
Fathin Saifur Rahman (ITB, Indonesia)
Waluyo (ITENAS, Indonesia)

Technical Program :
Chair : **Nanang Hariyanto (ITB, Indonesia)**
Member :
Bambang Anggoro (ITB, Indonesia)
Syarif Hidayat (ITB, Indonesia)
Sumaryadi (PT. PLN Persero)
Andreas (PT. PLN Persero)
Ariadi Hazmi (UNAND, Indonesia)
Salama Manjang (UNHAS, Indonesia)
Sarjiya (UGM, Indonesia)

Technical Arrangement :
Chair : **Pradita O. H. (ITB, Indonesia)**
Member :
Rizky Rahmani (ITB, Indonesia)
Bryan Denov (ITB, Indonesia)
Arpan Zaeni (ITB, Indonesia)
Rahman Azis P (ITB, Indonesia)

International Advisory Committee

Suwarno (Indonesia)	Y. Haroen (Indonesia)
Bambang Anggoro (Indonesia)	Iwa Garniwa (Indonesia)
Tumiran (Indonesia)	Z. Nawawi (Indonesia)
N. Sisworahardjo (USA)	S. Sekers (Turkey)
M. Hikita (Japan)	A. Cavallini (Italy)
B.W. Lee (South Korea)	T. Takahashi (Japan)
Jaeho Choi (South Korea)	Y. Mitani (Japan)
S Gubanski (Sweden)	M. Kamarol (Malaysia)
A. Abu Siada (Australia)	Guan Jun Zhang (China)
Tian Hua Liu (Taiwan)	Uwe Sichler (Austria)
Peter Werle (Germany)	N. Hozumi (Jepang)
Syamsir Abduh (Indonesia)	Sasongko P (Indonesia)
Adi Soepriyanto (Indonesia)	Evy Haryadi (Indonesia)
Salama M. (Indonesia)	I.A.G. Antari (Indonesia)

Invitation

The 3rd International Conference on High Voltage Engineering and Power Systems 2021 (ICHVEPS 2021) will be held in Bandung (*Virtual Conference*), The Capital of West Java, Indonesia 5-6 October 2021. This is a biannual conference organized by the School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Indonesia and technically sponsored by IEEE Indonesia Section, Power and Energy Society Indonesia Chapter and IEEE ITB Student Branch and supported by Indonesia Electrical Power Company (PT. PLN Persero). The conference is designed to be an international forum for exchange ideas, discussion and dissemination of research results and technologies in the field of High Voltage Engineering and Power Systems. The previous conference (The 1st ICHVEPS 2017) was held in Bali October 2017 and The 2nd ICHVEPS 2019 was held also in Bali October 2019. The previous conferences was typically attended by 250 participants from 15 countries such as Indonesia, Malaysia, India, Australia, China, Japan, Taiwan, Brunei Darussalam, France, Sweden, USA, Germany and Korea including a number of prominent invited speakers. 3rd ICHVEPS 2021 cordially invites researchers, professors, faculty members as well as students from universities and researchers and practitioners from power utilities and industries all over the world to submit abstracts and papers to this conference. All accepted papers will be sent to IEEE Xplore (and Scopus) and selected papers will be recommended for publication in International Journal on Electrical Engineering and Informatics and Journal of Engineering and Technological Sciences.

About Bandung

Bandung is Indonesia's second largest metropolis after the nation's capital city, Jakarta. It's also the capital of the West Java province. Bandung offers travellers a well-balanced mix of modernity, history, culture and some cool nature scenes. Right in the city hub, you'll find its commercial and business districts are alive with chic dining spots and boutique-lined streets. The trendy vibe of the city has helped give its famous moniker, the "Paris of Java". It even has dedicated streets favoured by local weekenders and visitors for top-quality fashion items.

CALL FOR PAPERS

The 3rd International Conference on High Voltage Engineering and Power Systems 2021

Virtual Conference

October 5 - 6, 2021
Bandung, Indonesia

Organized by:

School of Electrical Engineering and Informatics
Institut Teknologi Bandung, Indonesia

Technically Sponsored by:

IEEE Indonesia Section
Power and Energy Society Chapter
PT. PLN (Persero)
IEEE ITB Student Branch

The 3rd International Conference on High Voltage Engineering and Power Systems 2021

Main Gate of Institut Teknologi Bandung, Indonesia

ICHVEPS 2019 in Grand Inna Bali Beach, Bali, Indonesia

Language

The working language of the symposium is English. All printed matter will appear in English.

Registration Fee

Member-type	International Participant	Domestic Participant
IEEE Member	USD 200	-
Non-Member	USD 250	-
Student	USD 150	-
Local Participant	-	IDR 3.000.000
Local Academia (Lecture/Student)	-	IDR 1.500.000
Participant without papers submission (International)	USD 100	-
Participant without papers submission (Local)	-	IDR 1.500.000

ICHVEPS 2021 SECRETARIAT

General Secretary:

Umar Khayam

School of Electrical Engineering and Informatics
Bandung Institute of Technology
Jl. Ganesha 10 Bandung 40132, Indonesia

Phone : +62-852-9219-8369 (Rizky)
+62-859-5666-6696 (Lunnetta)
Fax : +62-22-2506291
E-mail : secretary@ichveps.org
(International participant)
ichvps2021@stei.itb.ac.id

Main Topics

1. High Voltage Generation, Measurement, and Instrumentation
2. High Voltage Insulation System
3. Condition monitoring and diagnosis for power equipments and power systems
4. Dielectric materials and their aging mechanisms
5. New and environmental friendly materials for high voltage application
6. Application of high voltage in industry
7. Degradation assessment for power equipment
8. Transients Phenomena
9. Outdoor Insulation: Insulator, Environmental Effects
10. High Voltage Insulation for UHV AC and HVDC System
11. High Voltage Apparatus: Reliability and Maintenance
12. Grounding system
13. Power Quality
14. Electromagnetic Compatibility
15. Smart Grid Technology
16. High Voltage Engineering Education
17. Power system planning, operation and control
18. Power system stability
19. FACTS
20. Renewable energy and microgrid

Abstract Submission

You are invited to submit your abstract(s) through the abstract submission system that can be reached from the conference web site. Abstract can be received by text only, no figures or graphs, with length of around 300 words. Detail of abstract submission can be seen in the conference web site.

Important Dates

Abstract Submission : **June 1, 2021**
Notification : **June 15, 2021**
Full Paper Submission : **July 15, 2021**

CONFERENCE DAYS

July 1-2, 2021

LIST OF PAPERS

Session Number	Paper No.	Title, Author & Institution	Page
PS1-2	150	<p>New Family of Voltage-Source Converters Derived Using New Basic Cell for Microgrid Applications</p> <p>Pekik Argo Dahono, Andriazis Dahono</p> <p>School of Electrical Engineering and Informatics, Institut Teknologi Bandung Bandung, Indonesia</p>	1
PS1-3	147	<p>Research Trends in Online Partial Discharge Monitoring and Diagnosis Utilizing ICT in Electric Power Equipment</p> <p>Masayuki Hikita, Masahiro Kozako</p> <p>Department of Electrical and Electronics Engineering, Kyushu Institute of Technology, Kitakyushu, Japan</p>	6
PS1-4	149	<p>Research on insulation defect localization technology of power equipment</p> <p>Guanjun Zhang, Xiaochang Hua, Haotian Zhang, Dingge Chang, Haibao Mu</p> <p>State Key Lab of Electrical Insulation and Power Equipment, Xi'an Jiaotong University, Xi'an, China</p>	14
PS1-5	99	<p>Potential of Biomass as RE Source for Sustainable Electricity Supply in Eastern Indonesia</p> <p>Tumiran¹, Mohammad Na'iem², Sarjiya³, Lesnanto Multa Putranto⁴, Tomy Listyanto⁵, Adi Priyanto⁶, Ahmad Adhiim Muthahhari⁷ and Rizki Firmansyah Setya Budi⁸</p> <p>^{1,3,4,7,8}Department of Electrical and Information Engineering, Universitas Gadjah Mada, Yogyakarta, Indonesia ²Department of Silvikultur, Universitas Gadjah Mada, Yogyakarta, Indonesia ⁵Department of Forest Products Technology, Universitas Gadjah Mada, Yogyakarta, Indonesia ⁶System Planning Division, PT. PLN (Persero), Jakarta, Indonesia</p>	22
PS2-3	158	<p>An Approach for Quantifying Risk of Asset Failure in a Power System Business</p> <p>A.P. Purnomoadi¹, A. Pharmatrisanti², S. Rositawati³, M.P. Marbun⁴, A.S. Surya⁵, H. Nugraha⁶, I. Arifianto⁷, D.F. Hakam⁸ and A.M.J. Simatupang⁹</p> <p>^{1,6,7,8}Center of Excellence, PLN Indonesia, Jakarta, Indonesia ²Finance & Risk Mgmt. Directorate, PLN Indonesia, Jakarta, Indonesia ³Jawa-Bali Load & Dispatch Center, PLN Indonesia Jakarta, Indonesia ⁴System Planning Division, PLN Indonesia, Jakarta, Indonesia ⁵PLN Research Institute, PLN Indonesia, Jakarta, Indonesia ⁹IT System Division, PLN Indonesia, Jakarta, Indonesia</p>	28
PS2-4	91	<p>Application of Polarization and Depolarization Current Measurement for Rotating Machine Insulation Analysis</p> <p>Norasage Pattanadech¹, P. Nimsanong², and T. Worthong³</p> <p>¹Department of Electrical Engineering, School of Engineering, King Mongkut's Institute of Technology, Ladkrabang, Bangkok, Thailand ²Power System Operation and Control Section 2, Power System Control Dept.</p>	34

		Metropolitan Electricity Authority, Bangkok, Thailand ³ Maintenance Electrical Section, Manager - Maintenance Electrical, Phase 3-5 Coal Fired Units, Global Power Synergy Public Co., Ltd., Rayong, Thailand	
PS2-5	156	Understanding of Outdoor Insulator Characteristics through Leakage Current and Electrical Equivalent Circuit Suwarno School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Bandung, Indonesia	39
PS3-1	153	An Effective Damping Control Scheme to Improve Inter-Area Power System Stability A. Abu-Siada ¹ , Suwarno ² , Nanang Hariyanto ³ , Fathin Saifur Rahman ⁴ , Muhammad Ruswandi Djalal ⁵ , Joko Hartono ⁶ , Rathy Shinta Utami ⁷ and Luky Handayani ⁸ ¹ Electrical and Computer Engineering Department, Curtin University Perth, Australia ^{2,3,4,7,8} School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Bandung, Indonesia ⁵ Department of Energy Engineering, Politeknik Negeri Ujung Pandang, Makassar, Indonesia ⁶ Transmission and Distribution Department, PT PLN Research Institute Jakarta, Indonesia	45
PS3-2	154	Towards the 2nd edition of IEC 60034-18-41: challenges and perspectives Alberto Rumi, Jacopo Marinelli and Andrea Cavallini* Dept. of Electrical, Electronic and Information Engineering "Guglielmo Marconi", University of Bologna, Bologna, Italy	52
PS3-3	148	Charge Trap Spectroscopies in Polymer Dielectrics: Application to BOPP Gilbert Teyssedre ¹ , Duvan Mendoza-Lopez ² , Christian Laurent ³ , Laurent Boudou ⁴ , Laurent Berquez ⁵ and Feihu Zheng ⁶ ^{1,2,3,4,5} Laplace, CNRS and University Paul Sabatier Toulouse, Toulouse, France ⁶ Department of Electrical Engineering, Tongji University, Shanghai, China	57
PS3-5	163	Influence of Corona Ageing on Electrical and Mechanical Behaviour of Epoxy Micro-Nanocomposites Myneni Sukesh Babu ¹ , R. Sarathi ^{2*} , Takahiro Imai ³ ^{1,2} Department of Electrical Engineering, Indian Institute of Technology Madras Chennai, India ³ Infrastructure Systems Research and Development Center, Toshiba Infrastructure Systems & Solutions Corporation, Toshiba-cho, Fuchu-shi, Tokyo, Japan	65
PTS1-1_1	39	Study on Equivalent Circuit of Epoxy Resin Insulators based on Leakage Current Waveforms Under Clean Fog Conditions Adjie Bagaskara, Suwarno School of Electrical Engineering and Informatics, Institut Teknologi Bandung Bandung, Indonesia	69
PTS1-1_2	80	Study of Leakage Current Characteristics of High Voltage Insulators Ageing	74

		<p>After Dry Season in Polluted Environmental Conditions</p> <p>Salama Manjang, Syafaruddin, Tambi, Mustarum Musaruddin, Ikhlas Kitta</p> <p>Department of Electrical Engineering Hasanuddin University Makassar, Indonesia, Department of Electrical Engineering, Halu Oleo University Kendari, Indonesia</p>

ICHVEPS 2021

05/10/2021 - 06/10/2021

This event has passed.

The poster for the 3rd International Conference on High Voltage Engineering and Power Systems (ICHVEPS 2021) features a green and white color scheme. At the top right, it states "Towards sustainable and reliable power delivery". The main title is "THE 3RD INTERNATIONAL CONFERENCE ON HIGH VOLTAGE ENGINEERING AND POWER SYSTEMS Bandung, 5 - 6 OCTOBER 2021 - Virtual Conference -". The ICHVEPS 2021 logo is prominently displayed. Below the title, the "Invited Speakers" section lists 15 individuals with their names and affiliations. To the right, the "Important Dates" section lists: Abstract Submission: August 05, 2021; Notification: August 10, 2021; Full Paper Submission: August 15, 2021.

Invited Speakers

- Prof. Masayuki Hikita (Kyushu Institute of Technology, Japan)
- Prof. Guo-Jun Zhang (Tsinghua University (THU), China)
- Dr. Nanang Hariyanto (Institut Teknologi Bandung, Indonesia)
- Prof. B. Sarathi (SRM Institute of Science, India)
- Dr. Tamiran (Universitas Sebelas Maret, Indonesia)
- Prof. Ahmed Abu Sitta (Ain Shams University, Australia)
- Prof. Andrea Cavallini (University of Bologna, Italy)
- Prof. Udaya Madawala (Auckland University, New Zealand)
- Prof. Saswanto (Institut Teknologi Bandung, Indonesia)
- Prof. Gilbert Teyssandre (UMS - IUTM, Suisse, France)
- Prof. Herasaga Pattanadech (King Mongkut's Institute of Technology Ladkrabang, Thailand)
- Prof. Pekki Argo Dahono (Institut Teknologi Bandung, Indonesia)
- Dr. Andreas Putra Purnomoadi (PT PLN (Persero) Unit Bisnis Listrik, Indonesia)
- Prof. Eduard Mujaji (Indonesian University, Indonesia)
- Dr. M.V. Reddy (Institute of Research and Development, Canada)

Important Dates

- Abstract Submission : August 05, 2021
- Notification : August 10, 2021
- Full Paper Submission : August 15, 2021

THE 3RD INTERNATIONAL CONFERENCE ON HIGH VOLTAGE ENGINEERING AND POWER SYSTEMS

Bandung, 5 - 6 OCTOBER **2021**

- Virtual Conference -

Important Dates

Abstract Submission : August 05, 2021
Notification : August 10, 2021
Full Paper Submission : August 15, 2021

Invited Speakers

Prof. Masayuki Hikita
(Kyushu Institute of Technology, Japan)

Prof. Guan-Jun Zhang
(Xi'an Jiaotong University (XJTU), Xi'an, China)

Dr. Nanang Hariyanto
(Institut Teknologi Bandung, Indonesia)

Prof. R. Sarathi
(IIT Madras, India)

Dr. Tumiran
(Universitas Gadjah Mada, Indonesia)

Prof. Ahmed Abu Siada
(Curtin University, Australia)

Prof. Andrea Cavallini
(University of Bologna, Italy)

Prof. Udaya Madawala
(Auckland University, New Zealand)

Prof. Suwarno
(Institut Teknologi Bandung, Indonesia)

Prof. Gilbert Teysedre
(CNRS, LAPLACE, Toulouse, France)

Prof. Norasage Pattanadech
(King Mongkut's Institute of Technology
Ladkrabang, Thailand)

Prof. Pekik Argo Dahono
(Institut Teknologi Bandung, Indonesia)

Dr. Andreas Putro Purnomoaji
(PT. PLN (Indonesian Electric Power Company,
Indonesia)

Prof. Eduard Mujjadi
(Auburn University, Alabama, US)

Dr. M.V. Reddy
(Institute of Research Hydro-Québec,
Canada)

Main Topics

1. High Voltage Generation, Measurement, and Instrumentation
2. High Voltage Insulation System
3. Condition monitoring and diagnosis for power equipments and power systems
4. Dielectric materials and their aging mechanisms
5. New and environmental friendly materials for high voltage application
6. Application of high voltage in industry
7. Degradation assessment for power equipment
8. Transients Phenomena
9. Outdoor Insulation: Insulator, Environmental Effects
10. High Voltage Insulation for UHV AC and HVDC System
11. High Voltage Apparatus: Reliability and Maintenance
12. Grounding system
13. Power Quality
14. Electromagnetic Compatibility
15. Smart Grid Technology
16. High Voltage Engineering Education
17. Power system planning, operation and control
18. Power system stability

All accepted papers will be indexed in IEEE Explore and Scopus

The 3rd International Conference on High Voltage Engineering and Power Systems 2021 (ICHVEPS 2021) will be held in Bandung (Virtual Conference), The Capital of West Java, Indonesia 5-6 October 2021. This is a biannual conference organized by the School of Electrical Engineering and Informatics, Institut Teknologi Bandung, Indonesia and technically sponsored by IEEE Indonesia Section, Power and Energy Society Indonesia Chapter and IEEE ITB Student Branch and supported by Indonesia Electrical Power Company (PT. PLN Persero).

The conference is designed to be an international forum for exchange ideas, discussion and dissemination of research results and technologies in the field of High Voltage Engineering and Power Systems. The previous conference (The 1st ICHVEPS 2017) was held in Bali October 2017 and The 2nd ICHVEPS 2019 was held also in Bali October 2019.

The previous conferences was typically attended by 250 participants from 15 countries such as Indonesia, Malaysia, India, Australia, China, Japan, Taiwan, Brunei Darussalam, France, Sweden, USA, Germany and Korea including a number of prominent invited speakers.

3rd ICHVEPS 2021 cordially invites researchers, professors, faculty members as well as students from universities and researchers and practitioners from power utilities and industries all over the world to submit abstracts and papers to this

conference. All accepted papers will be sent to IEEE Xplore (and Scopus) and selected papers will be recommended for publication in [International Journal on Electrical Engineering and Informatics](#) and [Journal of Engineering and Technological Sciences](#).

Abstract:

Recently, one trend of research is an investigation on vertical farming based on the internet of things (IoT). It involves some methods of controlling system, physical parameters including sensors and transducers, both hardware and software, and energy consumption. Nevertheless, this paper focuses on electric power and energy consumption. The electrical quantities were voltage and current, which were sensed and entered to Arduino Mega 2560 to be processed, and further to a Node MCU ESP8266, smartphone, and Blynk to monitor and log the data of power based on the internet of things (IoT). The loads were LED lamps and pH pumps through a relay. The controlling systems were scheduled and fuzzy bases, to be compared. The power was directly monitored and logged in every one minute by using the Blynk of a smartphone, whereas the energy was computed by using trapezoidal and Simpson's composite rules. For one day, the fuzzy-based method could save 85.05 Wh (5.44%) and 84.32 Wh (5.42%) compared to the scheduled-based method, using the trapezoidal and Simpson's composite rules respectively. The hourly-absolute-based energy differences between the scheduled and fuzzy bases were 116.66 Wh and 116.03 Wh using trapezoidal and Simpson's composite rules respectively, for one day. While both computations yielded a deviation of 0.40% only. Thus, the fuzzy-base controlling method could considerably save consumed energy.

I. Introduction

Conventional farming is manual monitoring and labor-consuming and may be farmers' high loading [1]. Therefore, there have been some types of research concerning smart agriculture, farming, or hydroponics systems using a fuzzy system [1], fuzzy logic and wireless sensors [2] and fuzzy micro-climate controlling [3], fuzzy logic, and Nutrient Film Technique (NFT)-based system [4]. Abstract— Recently, one trend of research is an investigation on vertical farming based on the internet of things (IoT). It involves some methods of controlling system, physical parameters including sensors and transducers, both hardware and software, and energy consumption. Nevertheless, this paper focuses on electric power and energy consumption. The electrical quantities were voltage and current, which were sensed and entered to Arduino Mega 2560 to be processed, and further to a Node MCU ESP8266, smartphone, and Blynk to monitor and log the data of power based on the internet of things (IoT). The loads were LED lamps and pH pumps through a relay. The controlling systems were scheduled and fuzzy bases, to be compared. The power was directly monitored and logged in every one minute by using the Blynk of a smartphone, whereas the energy was computed by using trapezoidal and Simpson's composite rules. For one day, the fuzzy-based method could save 85.05 Wh (5.44%) and 84.32 Wh (5.42%) compared to the scheduled-based method, using the trapezoidal and Simpson's composite rules respectively. The hourly-absolute-based energy differences between the scheduled and fuzzy bases were 116.66 Wh and 116.03 Wh using trapezoidal and Simpson's composite rules respectively, for one day. While both computations yielded a deviation of 0.40% only. Thus, the fuzzy-base controlling method could considerably save consumed energy.

Keywords— energy, fuzzy, power, Simpson's composite, trapezoidal composite

I. INTRODUCTION

Conventional farming is manual monitoring and labor-consuming and may be farmers' high loading [1]. Therefore, there have been some types of research concerning smart agriculture, farming, or hydroponics systems using a fuzzy system [1], fuzzy logic and wireless sensors [2] and fuzzy micro-climate controlling [3], fuzzy logic, and Nutrient Film Technique (NFT)-based system [4]. They also involved IoT [5] and IoT-automation bases [6], indoor IoT automation [7], IoT with artificial intelligence [8]. Besides that, smart farming involved automated IoT and fuzzy logic [9], IoT and fuzzy logic control [10], and IoT and fuzzy-based hybrid [11]. They involved intelligent sensors [12] and automation concerns [13] too. The soil condition was investigated too,

such as a minimized soil [14] and soil humidity [15] concerns. The researches were also conducted on irrigation concern of smart farming, such as precision irrigation [16], IoT-based smart irrigation [17], IoT-based multi-agent irrigation [18], and automatic irrigation controlling [19]. Moreover, they also investigated energy efficiency [20] and clean energy [21] concerns.

Based on the literature reviews, the researches concerning smart farming which involved energy consumption are still rare. Therefore, this paper presents power and energy conditions in the research of smart farming.

II. RESEARCH METHOD

Fig. 1 shows the block diagram of the power system part in the designed smart farming prototype. The quantities of current and applied voltage were entered into an Arduino Mega 2560. Furthermore, the power entered to Node MCU ESP 8266, to be monitored and controlled by a smartphone, displayed and recorded by the Blynk application. The power supplied LEDs (light-emitting diodes) and pumps for controlling the plants.

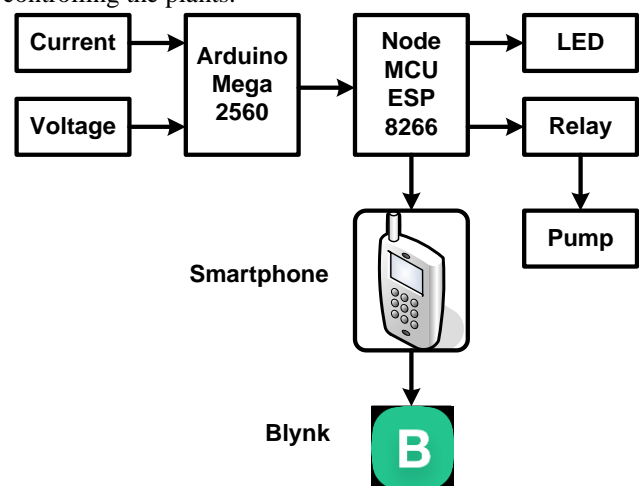

Fig. 1. Block diagram of power part on smart farming

The program of voltage sensor for measurement is the flowchart, as shown in Fig. 2. The first was an initialization of the voltage sensor. In this stage, the system determined the communication line, used by the voltage. Furthermore, the voltage sensor received the ADC value from the Arduino and multiplied it with the results of the linear regression calibration with the ADC value in the program to get the voltage that passed through the sensor.

Fig. 2. Flowchart of voltage measurement

The current measurement used an ACS721 sensor. The run program followed the flowchart as shown in Fig. 3. At the stage of ACS721 sensor initialization, the system established a communication path and identified the sensor library. Furthermore, the microcontroller reading of the current sensor was carried out a calibration to get a current value of the ADC signal, to be entered into a linear regression equation from some of the data that has been sampled to get the value of a linear equation. Thus, the current sensor reading could approach the actual value to get the power in the program, by multiplying the current and voltage sensor readings.

Fig. 3. Flowchart of current measurement

By using ACS721, the system establishes the communication path and the identity of the sensor library. The reading of the

microcontroller for this current sensor is carried out by calibrating, to get the current value of the converted ADC signal in the program to generate the voltage value on the current sensor. Furthermore, the voltage result is carried out by multiplying the current sensor value and a constant.

After reading each parameter by the sensor, the reading results of the data were sent to the node MCU microcontroller. From the node MCU, the data were sent to the cloud Blynk server to store and monitor the results of the sensor readings on the smartphone. The program, to run this command, follows the flow chart is shown in Fig. 4. Starting from the Arduino, serial communication with the node MCU was carried out, where the results of Arduino sensor readings were sent to the node MCU, they were continued by sending sensor reading data to the cloud server Blynk, using an internet connection to store the data on the server and monitored on the Blynk application on the smartphone.

Fig. 4. Blynk storage flowchart

The power was computed by using (1).

$$P = vxi \quad (1)$$

Figs. 5(a) and 5(b) show voltage and current sensors which were used for the system. The system determines the communication line used by the voltage. The voltage sensor receives the ADC value from the Arduino and converts it by multiplying and dividing the analog value or ADC with the resistor value on the voltage sensor to get the voltage passes through the sensor.

Fig. 5. (a) voltage and (b) current sensors

This system used a relay, a type of switch group which operates based on electromagnetic principles which are used to move contactors to connect the circuit indirectly. The closing and opening of the contactor are caused by the effect of magnetic induction generated from the inductor coil which is energized by an electric current. This study used a 5 volts relay, 6 channels connected to a water pump. Another specification is a contact current of 10 A, on 250 V ac or 30 V dc.

Fig. 6 shows the used grow light LEDs (light-emitting diodes) for the illuminance controlling as necessary on the smart farming. The grow light emitted color spectrum is dominant in red and blue, suitable for plant growth.

Fig. 6. Grow light LEDs

As a server service, Blynk is used to support the Internet of Things Based on Android and iOS, it can be used by smartphone users. It also allows designing interfaces with various output and input components that support sending and receiving data, and displaying it on the screen. The representations of data can be in the form of visual numbers or graphs. Blynk Server is a cloud-based backend service facility that is responsible for managing communication between applications and hardware [22].

The power was consumed by the grow light LEDs and peristaltic pumps. While the consumed energy was the integration of power as a time function. Nevertheless, the data recording of the power was intermittent, so that the consumed energy was computed by using numerical methods. The famous methods of numerical integration for many segments are trapezoidal and Simpson's composite rules [23]. Thus, the energy was computed by two methods, trapezoidal dan Simpson's composite rules [23], as the basic formulae (2) and (3) respectively.

$$I = \frac{h}{2} [f(x_0) + 2 \sum_{i=1}^{n-1} f(x_i) + f(x_n)] \quad (2)$$

$$I = \frac{h}{3} [f(x_0) + 4 \sum_{i=1,3,5,\dots}^{n-1} f(x_i) + 2 \sum_{i=2,4,6,\dots}^{n-2} f(x_i) + f(x_n)] \quad (3)$$

There were two methods to run the system, namely scheduled and fuzzy-based methods. The former was a determining operation in a range of 18:30 and 05:30. While the latter was operated automatically for 24 hours. Both methods operated simultaneously.

III. RESULTS AND DISCUSSION

Fig. 7 shows a sample display of monitoring parameter charts on Blynk. The charts consisted of PWM, fuzzy power, scheduled power, and illuminance. The scheduled power was the LEDs were turned from 18:30 until 05:30. It is seen that there was a slight difference between fuzzy power and scheduled power. Generally, at night, the fuzzy power was lower rather than that at noon. This occurrence was caused by not any illuminance in the night. However, in the noon, the fuzzy power was slightly higher than that scheduled power.

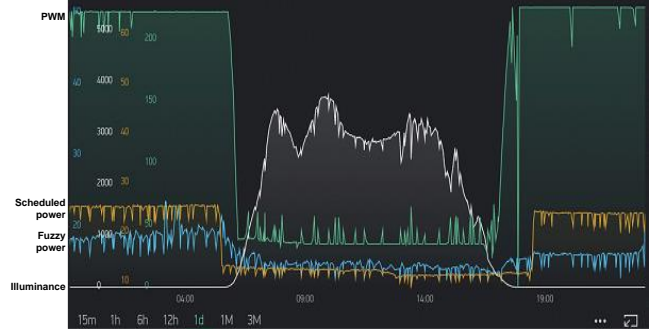

Fig. 7. Display of monitoring charts

Fig. 8 shows the current and PWM charts versus ADC binary codes. It is shown that both parameters approached to be linear and similar, to decrease as the ADC binary codes increased. Thus, the component operated properly. Besides that, the current tended to be linear. Thus, the current and PWM were linear.

Fig. 8. Current and PWM versus ADC

Fig. 9 shows the consumed power at every hour both for fuzzy and scheduled methods. The scatter plots were based on the median values during one hour. No doubt, at night, the scheduled power was slightly higher than that using the fuzzy method. The average power of the scheduled method from 00:00 until 06:00 was 91.97 watts, whereas the fuzzy used power was 83.53 W. Therefore, the difference average power was 8.44 watts. While, from 18:00 until 00:00, the scheduled average power was 79.73 watts, and that the fuzzy method was 71.67 watts. Thus, the difference in the average power was 8.06 watts. Therefore, the night, before and after 00:00 o'clock, the average power difference was almost the same. While, in the noon, from 07:00 until 17:00, the fuzzy method power was visually slightly higher than that the scheduled power. The average fuzzy method power was 51.48 watts, whereas the average scheduled power was 49.84 watts. Therefore, the difference in average power for both methods was -1.64 watts. In the noon, both methods were almost the

same. This case was probably caused by the illuminance of solar irradiance.

Fig. 9. A day consumed powers

Fig. 10 shows the every hour energy. Generally, it shows the consumed energy at the night was higher than that at the noon. This case was caused by the illuminance of the solar irradiance at the noon.

Fig. 10. A day consumed energies

Fig. 11 shows the scheduled-to-fuzzy method difference energy. The difference energy was positive at the noon and negative at the night. Nevertheless, the positive values of power difference were considerably higher, than that the negative values, as around five times. The used fuzzy method energy could be saved 85.05 Wh and 84.32 Wh compared to that the scheduled-based method, using trapezoidal and Simpson's composite rules respectively, or it is 5.44% and 5.42%.

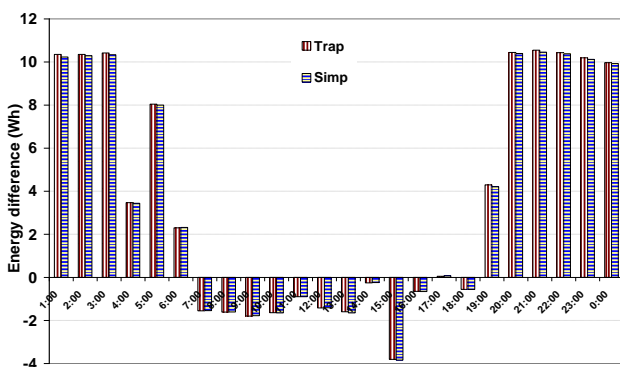

Fig. 11. A day scheduled-to-fuzzy difference energy

The hourly-absolute-based energy differences between the scheduled and fuzzy bases were 116.66 Wh and 116.03 Wh using trapezoidal and Simpson's composite rules

respectively, for that day. While both computations yielded a deviation of 0.40% only. Thus, the fuzzy-base controlling method could considerably save consumed energy.

IV. CONCLUSION

The power part of the IoT-based vertical farming has been implemented. It involved some methods of control systems, including sensors, both hardware and software, and consumed-energy computations. The electrical quantities were voltage and current, which were sensed and entered to Arduino Mega 2560 to be processed, and further to a Node MCU ESP8266, smartphone, and Blynk to monitor and log the data of power based on the internet of things (IoT). The loads were LED lamps and pH pumps through a relay. The controlling systems were scheduled and fuzzy bases, to be compared. The power was directly monitored and logged in every one minute by using the Blynk of a smartphone, whereas the energy was computed by using trapezoidal and Simpson's composite rules. For one day, the fuzzy-based method could save 85.05 Wh (5.44%) and 84.32 Wh (5.42%) compared to the scheduled-based method, using the trapezoidal and Simpson's composite rules respectively. The hourly-absolute-based energy differences between the scheduled and fuzzy bases were 116.66 Wh and 116.03 Wh using trapezoidal and Simpson's composite rules respectively, for one day. While both computations yielded a deviation of 0.40% only. Thus, the fuzzy-base controlling method could considerably save consumed energy.

IEEE COPYRIGHT AND CONSENT FORM

To ensure uniformity of treatment among all contributors, other forms may not be substituted for this form, nor may any wording of the form be changed. This form is intended for original material submitted to the IEEE and must accompany any such material in order to be published by the IEEE. Please read the form carefully and keep a copy for your files.

Comparative Power and Energy Consumptions between Scheduled and Fuzzy Controlling on an IoT-based Vertical Farming
Waluyo, Andre Widura, Febrian Hadiatna, Delvin Anugerah
2021 3rd International Conference on High Voltage Engineering and Power Systems (ICHVEPS)

COPYRIGHT TRANSFER

The undersigned hereby assigns to The Institute of Electrical and Electronics Engineers, Incorporated (the "IEEE") all rights under copyright that may exist in and to: (a) the Work, including any revised or expanded derivative works submitted to the IEEE by the undersigned based on the Work; and (b) any associated written or multimedia components or other enhancements accompanying the Work.

GENERAL TERMS

1. The undersigned represents that he/she has the power and authority to make and execute this form.
2. The undersigned agrees to indemnify and hold harmless the IEEE from any damage or expense that may arise in the event of a breach of any of the warranties set forth above.
3. The undersigned agrees that publication with IEEE is subject to the policies and procedures of the [IEEE PSPB Operations Manual](#).
4. In the event the above work is not accepted and published by the IEEE or is withdrawn by the author(s) before acceptance by the IEEE, the foregoing copyright transfer shall be null and void. In this case, IEEE will retain a copy of the manuscript for internal administrative/record-keeping purposes.
5. For jointly authored Works, all joint authors should sign, or one of the authors should sign as authorized agent for the others.
6. The author hereby warrants that the Work and Presentation (collectively, the "Materials") are original and that he/she is the author of the Materials. To the extent the Materials incorporate text passages, figures, data or other material from the works of others, the author has obtained any necessary permissions. Where necessary, the author has obtained all third party permissions and consents to grant the license above and has provided copies of such permissions and consents to IEEE

You have indicated that you DO wish to have video/audio recordings made of your conference presentation under terms and conditions set forth in "Consent and Release."

CONSENT AND RELEASE

1. In the event the author makes a presentation based upon the Work at a conference hosted or sponsored in whole or in part by the IEEE, the author, in consideration for his/her participation in the conference, hereby grants the IEEE the unlimited, worldwide, irrevocable permission to use, distribute, publish, license, exhibit, record, digitize, broadcast, reproduce and archive, in any format or medium, whether now known or hereafter developed: (a) his/her presentation and comments at the conference; (b) any written materials or multimedia files used in connection with his/her presentation; and (c) any recorded interviews of him/her (collectively, the "Presentation"). The permission granted includes the transcription and reproduction of the Presentation for inclusion in products sold or distributed by IEEE and live or recorded broadcast of the Presentation during or after the conference.
2. In connection with the permission granted in Section 1, the author hereby grants IEEE the unlimited, worldwide, irrevocable right to use his/her name, picture, likeness, voice and biographical information as part of the advertisement, distribution and sale of products incorporating the Work or Presentation, and releases IEEE from any claim based on right of privacy or publicity.

BY TYPING IN YOUR FULL NAME BELOW AND CLICKING THE SUBMIT BUTTON, YOU CERTIFY THAT SUCH ACTION CONSTITUTES YOUR ELECTRONIC SIGNATURE TO THIS FORM IN ACCORDANCE WITH UNITED STATES LAW, WHICH AUTHORIZES ELECTRONIC SIGNATURE BY AUTHENTICATED REQUEST FROM A USER OVER THE INTERNET AS A VALID SUBSTITUTE FOR A WRITTEN SIGNATURE.

Information for Authors

AUTHOR RESPONSIBILITIES

The IEEE distributes its technical publications throughout the world and wants to ensure that the material submitted to its publications is properly available to the readership of those publications. Authors must ensure that their Work meets the requirements as stated in section 8.2.1 of the IEEE PSPB Operations Manual, including provisions covering originality, authorship, author responsibilities and author misconduct. More information on IEEE's publishing policies may be found at http://www.ieee.org/publications_standards/publications/rights/authorrightsresponsibilities.html Authors are advised especially of IEEE PSPB Operations Manual section 8.2.1.B12: "It is the responsibility of the authors, not the IEEE, to determine whether disclosure of their material requires the prior consent of other parties and, if so, to obtain it." Authors are also advised of IEEE PSPB Operations Manual section 8.1.1B: "Statements and opinions given in work published by the IEEE are the expression of the authors."

RETAINED RIGHTS/TERMS AND CONDITIONS

- Authors/employers retain all proprietary rights in any process, procedure, or article of manufacture described in the Work.
- Authors/employers may reproduce or authorize others to reproduce the Work, material extracted verbatim from the Work, or derivative works for the author's personal use or for company use, provided that the source and the IEEE copyright notice are indicated, the copies are not used in any way that implies IEEE endorsement of a product or service of any employer, and the copies themselves are not offered for sale.
- Although authors are permitted to re-use all or portions of the Work in other works, this does not include granting third-party requests for reprinting, republishing, or other types of re-use. The IEEE Intellectual Property Rights office must handle all such third-party requests.
- Authors whose work was performed under a grant from a government funding agency are free to fulfill any deposit mandates from that funding agency.

AUTHOR ONLINE USE

- **Personal Servers.** Authors and/or their employers shall have the right to post the accepted version of IEEE-copyrighted articles on their own personal servers or the servers of their institutions or employers without permission from IEEE, provided that the posted version includes a prominently displayed IEEE copyright notice and, when published, a full citation to the original IEEE publication, including a link to the article abstract in IEEE Xplore. Authors shall not post the final, published versions of their papers.
- **Classroom or Internal Training Use.** An author is expressly permitted to post any portion of the accepted version of his/her own IEEE-copyrighted articles on the author's personal web site or the servers of the author's institution or company in connection with the author's teaching, training, or work responsibilities, provided that the appropriate copyright, credit, and reuse notices appear prominently with the posted material. Examples of permitted uses are lecture materials, course packs, e-reserves, conference presentations, or in-house training courses.
- **Electronic Preprints.** Before submitting an article to an IEEE publication, authors frequently post their manuscripts to their own web site, their employer's site, or to another server that invites constructive comment from colleagues. Upon submission of an article to IEEE, an author is required to transfer copyright in the article to IEEE, and the author must update any previously posted version of the article with a prominently displayed IEEE copyright notice. Upon publication of an article by the IEEE, the author must replace any previously posted electronic versions of the article with either (1) the full citation to the

IEEE work with a Digital Object Identifier (DOI) or link to the article abstract in IEEE Xplore, or (2) the accepted version only (not the IEEE-published version), including the IEEE copyright notice and full citation, with a link to the final, published article in IEEE Xplore.

Questions about the submission of the form or manuscript must be sent to the publication's editor.

Please direct all questions about IEEE copyright policy to:

IEEE Intellectual Property Rights Office, copyrights@ieee.org, +1-732-562-3966

Bandung, August 20th, 2021

Dear Author(s),

It is our pleasure to inform you that your submission,

Number : 22

Title : Comparative Power and Energy Consumptions between Scheduled and Fuzzy Controlling on an IoT-based Vertical Farming

Author : Waluyo Waluyo, Andre Widura, Febrian Hadiatna and Delvin Anugerah

has been accepted for paper presentation at ICHVEPS 2021.

You are invited to present your paper in the 3rd International Conference on High Voltage Engineering and Power Systems 2021, on October 5-6, 2021.

We look forward to seeing you in the conference.

Sincerely,

A handwritten signature in black ink, appearing to be 'Umar Khayam', written over a horizontal line.

Dr. Umar Khayam

General Secretary of ICHVEPS2021

OFFICIAL RECEIPT

Date : September 22nd, 2021
Receipt No. : ICHVEPS2021/101

This will serve as the official payment receipt for the ICHVEPS2021 Virtual Conference scheduled on October 5-6, 2021.

Total paid : **IDR 1,500,000** (one million and five hundred thousand rupiahs)

We hereby confirm that **Waluyo** has paid IDR 1,500,000 for the conference fee of submission no. **22**.

If you have any questions regarding this receipt or require assistance, please contact the ICHVEPS 2021 Secretariat.

Sincerely,

A handwritten signature in blue ink is written over a circular blue stamp. The stamp contains the text 'The 3rd International Conference on High Voltage Engineering and Power Systems' around the top edge, 'ICHVEPS 2021' in the center, and '2021' at the bottom. There are also some decorative elements like trees and a sun/moon.

Dr. Fathin Salfur Rahman, S.T., M.T.
Finance Chair of ICHVEPS 2021

CERTIFICATE
